

ADEYEMI M. A

DATA & BUSINESS INTELLIGENCE ANALYST

+44 7901244037 | adeyemimichaeladewale@gmail.com | United Kingdom (Immediately available, open to relocation)

CAREER SUMMARY

I am a Data & BI Analyst with proven expertise in Power BI (DAX, Power Query, and data modelling), SQL, and Python for analytics automation. Skilled at transforming complex datasets into actionable insights that enhance decision-making, operational efficiency, and business performance. Experienced in delivering end-to-end BI solutions, from ETL and data governance to stakeholder-ready dashboards, within agile, cross-functional teams.

SKILLS

- **BI Tools & Languages:** Power BI (Power Query, DAX, Data Modelling, Report Design), SQL (Stored Procedures, Views, ETL), Python (Pandas, NumPy, Data Automation), Excel (Advanced Formulas, VBA).
- **Data & Analytics:** KPI Development, Forecasting, Variance & Root-Cause Analysis, Predictive Analytics, Workflow Automation, Data Quality & Governance, Storytelling & Visualisation, Agile Delivery.
- **Soft Skills:** Stakeholder Engagement (Technical & Non-Technical), Requirements Gathering, Process Improvement, Business Acumen, Mentoring & Knowledge Sharing.

PROFESSIONAL EXPERIENCE

DATA ANALYST | Worldpay

May 2024 – July 2025

- Designed and deployed interactive Power BI dashboards using advanced DAX measures to support treasury, risk, and compliance operations.
- Partnered with management to deliver performance and variance analyses that identified inefficiencies and improved reporting accuracy.
- Built SQL-based ETL pipelines and automated datasets, reducing latency and improving data reliability.
- Collaborated with cross-functional Agile teams to deliver iterative, data-driven solutions based on stakeholder feedback.
- Strengthened data governance and compliance frameworks, ensuring adherence to audit standards, scheme rules, and data lineage controls.
- Applied Python scripts for automated validation and anomaly detection within settlement and performance datasets.
- Delivered analytics supporting financial control and risk monitoring — directly transferable to claims performance and MI environments.

BUSINESS INTELLIGENCE ANALYST | Prosperis Holdings

May 2022 – Feb 2023

- Developed automated KPI dashboards in Power BI, integrating SQL and Python data sources to reduce manual reporting time by 50%.
- Designed and optimised DAX-based KPIs for executive-level performance insights and compliance reporting.
- Built and maintained SQL stored procedures and data views, ensuring real-time, multi-source data integration.
- Enhanced data quality and governance through systematic cleansing, reconciliation, and validation processes.
- Partnered with executives to build performance measurement frameworks aligned with growth and operational control objectives.
- Delivered insights supporting business performance reviews, similar in structure to claims trend and loss ratio reporting in insurance contexts.

MANAGEMENT INFORMATION ANALYST | FMS Farms Ltd

Jan 2021 – April 2022

- Delivered end-to-end BI solutions, from SQL-based ETL pipelines to Power BI dashboards and stakeholder training.
- Built data models and visualisations integrating multiple systems, improving transparency of financial, inventory, and operational data.
- Conducted root-cause and variance analyses to identify anomalies and improve data accuracy across reporting processes.
- Automated reporting workflows using Power Query and VBA, enhancing data integrity and efficiency.
- Collaborated with finance, operations, and supply chain teams to implement data-driven processes aligned with strategic and compliance objectives.

EDUCATION

- BACHELOR OF SCIENCE – ECONOMICS
Modules: Statistics, Econometrics, Database Systems, SQL for Analytics.
